

Medication Interaction Guide — Test Dataset A

Version: TEST-1.4 **Effective date:** 2026-08-05

Important Notice

This is synthetic, fictional data created solely for testing retrieval systems. The medication names and rules below are intentionally non-clinical placeholders and must not be used for medication decisions.

Test Interaction Records

Compound-X + Compound-Y: TEST-INTERACTION-RED. Retrieve the official hospital source before making any decision.

Compound-M + Compound-N: TEST-INTERACTION-AMBER. The assistant should cite this document when the pair is queried.

Interpretation Rule

The labels RED and AMBER are test labels only. They do not represent real clinical risk categories.

Version Rule

If another document has a later effective date for the same fictional interaction record, prefer the later document and cite its version.

RAG Test Questions

What is the test interaction label for Compound-X and Compound-Y?

Which document contains Compound-M and Compound-N?

Should the assistant prefer a later version?
